**PASSIVE PLUS, INC. PRODUCT SPOTLIGHT:  
0805N 1111N Series**

**Huntington, New York --- February 2018**

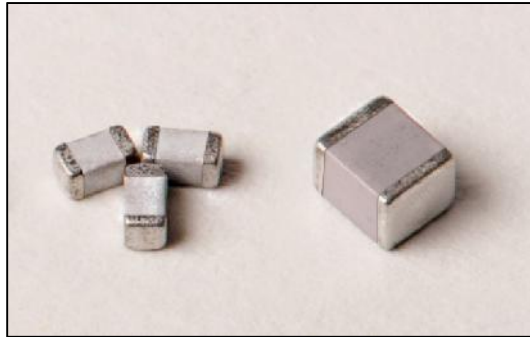

Passive Plus, Inc. (PPI) offers a Low ESR/ESL EIA capacitor series. These multi-layer capacitors have been developed for High-Q and Microwave applications including base station products and L/C filters. The 0805N and 1111N series capacitors have high self-resonance frequencies (to 25 GHz), exhibit NP0 characteristics, and are 100% RoHS compliant.

**0805N Series**

**Size:** .080" x .050"  
**Value Range:** 0.1pF – 220pF  
**WVDC:** 250V  
**TC:**  $0 \pm 30$  ppm/°C  
**Q=** 2000 min @ 1MHz

**1111N Series**

**Size:** .110" x .110"  
**Value Range:** 0.2pF – 1000pF  
**WVDC:** 500/1000V  
**TC:**  $0 \pm 30$  ppm/°C  
**Q=** 2000 min @ 1 MHz

Engineering Design kits, Data sheets, S-Parameter and modeling data, for each of the case sizes is available on the PPI website ([www.passiveplus.com](http://www.passiveplus.com)).

With over 30 years in the RF/Microwave industry, Passive Plus, Inc. manufactures high quality, high power passive components using state-of-the-art manufacturing techniques. Specializing in Magnetic & Non-Magnetic HI-Q/Low ESR Capacitors product lines, PPI supplies reliable quality components to the Military, Medical, Semiconductor, Broadcast and Telecommunications industries.

We are known for our superior Customer Service, Fast Deliveries, Competitive Prices and Outstanding Quality.

Contact Passive Plus directly at +1 (631) 425-0938 or [sales@passiveplus.com](mailto:sales@passiveplus.com) for quotes, pricing, orders, custom assembly requests or specific engineering questions.
